1. As a user, I want to be able to add a review to a movie so that I can share my opinion with others.

Acceptance Criteria:

- The system allows the user to select a movie from the list of available movies.

- The user can input a review (text) and a rating (e.g., 1-5 stars) for the selected movie.

- The review is saved and associated with the movie.

- The user receives a confirmation message that the review has been successfully added.

- The review is displayed when the movie details are viewed.

2. As a user, I want to be able to search for a movie by name or part of the name so that I can find the movie I am looking for.

Acceptance Criteria:

- The system provides a search bar where the user can input a movie name or part of the name.

- The system displays a list of movies that match the search query (partial or full match).

- If no movies match the search, the system displays a message: "No movies found."

- The search is case-insensitive and ignores leading/trailing spaces.

- The user can click on a movie from the search results to view its details.

3. As a user, I want to be able to list movies by a director so that I can see all the movies made by that director.

Acceptance Criteria:

- The system provides an option to filter movies by director.

- The user can input the director's name (full or partial) to search for movies.

- The system displays a list of all movies directed by the specified director.

- If no movies are found for the director, the system displays a message: "No movies

found for this director."

- The user can click on a movie from the list to view its details.
